The 3PL company Across Logistics is expanding with Generix Group WMS

Across Logistics chooses Generix Group's warehouse management system and positions itself on the market as a performing 3PL partner, able to adapt inventory management to customer needs and to provide effective solutions.

Across Logistics is a 3PL company specialized in international trade, with offices and subsidiaries in Europe and Asia. In addition to general storage, it also provides specific services such as customs warehousing, storage of dangerous goods, pre-refrigerated and refrigerated goods, and the entire Supply Chain services required by its customers, including transport, picking and packaging tasks for shipment to the end customer and even returns management.

To improve its current operations and also to prepare in the short term to offer services to customers who are committed to e-commerce, Across Logistics has decided to implement the **Warehouse Management System (WMS)** from Generix Group, allowing them to integrate the operations of their 7,747m² warehouse in Valencia with an **E-invoicing Module** also from Generix Group, which exchanges and obtains real time information from the WMS.

The combination of both tools allows a better control - in detail, simple and efficient - of volumes, flows and duration in the warehouse of customers' products, allowing simplified invoicing and important costs savings. For a 3PL operator the control of these parameters is essential to maintain a level of efficiency that prevents errors and guarantees the company's profit margins.

The WMS and the e-invoicing module will undoubtedly facilitate the forthcoming expansion of Across Logistics both in the activities already carried out by the company and in the new challenges it will face.

"We are proud that a logistics operator such as Across Logistics has entrusted us with its e-commerce logistics. This close collaboration is confirmation of the quality of our solutions in this field and our ability to support our customers", says Philippe Ducellier, General Manager for Generix Group in Spain.

About Generix Group

Generix Group is an expert in the Collaborative Supply Chain with presence in 60 countries thanks to its subsidiaries and network of partners. More than 6,000 companies around the world use its SaaS solutions. The group's 750 employees provide daily assistance to clients such as Carrefour, Danone, FM Logistic, Fnac-Darty, Essilor, Ferrero and Geodis in the digital transformation of their Supply Chains.

Its collaborative platform, Generix Supply Chain Hub, helps companies keep their promises to their customers. It connects companies to all their partners so together they can operate physical flows, digitize information flows, and collaboratively manage processes in real time.

About Across Logistics

Across Logistics advises, organises and coordinates transport operations by applying the rules of international trade, with the aim of ensuring that each piece of merchandise reaches its final destination in the shortest possible time and in perfect condition.
