

Choosing SOLOCHAIN WMS is opting for a highly extensible warehouse management system that perfectly suits the changing nature of business.

**3 Key Differentiators that Drives Growth**

**1** Highly flexible and configurable solutions, allowing scalability for your business growth.

**2** An acclaimed back-office that facilitates implementation and collaboration within your team and ecosystem.

**3** Modern graphical UI and visual tools, providing exceptional ease of use.

Highly integrated WMS and MES that enhances your company's agility

Warehouse automation that integrates complex processes easily

Interactive dashboards and intuitive interfaces to increase your team's performance

Gamification tools that quicken end-user training and multi-site rollouts

2D mapper and heatmap for increased productivity

A highly-engaged user community continuously shaping our solutions

Over 150 proven standard business processes to get a headstart

Over 500 KPI report variations for ultimate accuracy

**WE TURN YOUR BUSINESS PAIN POINTS INTO BENEFITS**

Inventory visibility is deficient	»»	Get accurate, real-time inventory visibility across the whole supply chain at the location level
Quality assurance can't complete the entire process	»»	Get forward and backward traceability of finished goods and raw materials throughout the supply chain
Omnichannel distribution is not maximized	»»	Manage different vendors and workflows at the same time within the warehouse
Risks of miscommunication and disruptions from incorrect or incomplete data	»»	Get accurate, real-time data
Hard time adapting to the digitization of the supply chain	»»	Benefit from intuitive, graphical and integrated user experiences

# SOLOCHAIN WMS Top Ten Capabilities

01	Intuitive user interface
02	Multi-site capabilities
03	Managing complex networks in one application
04	Supports variable deployments, SaaS, Cloud and on-premise
05	Real-time visibility through end-to-end inventory track and trace
06	Comprehensive recall management
07	Embedded MES capabilities
08	Automating warehouse with configurable rules and mobile execution workflows
09	Adaptability/flexibility through configuration and low-cod extensibility
10	Flexible 3PL Billing Engine Capabilities
