

Choosing SOLOCHAIN WMS is opting for a highly extensible warehouse management system that perfectly suits the unique nature of **food and beverage** businesses.

3 Key Differentiators that Drives Growth

1 Highly flexible and configurable solutions, allowing scalability for your business growth.

2 An acclaimed back-office that facilitates implementation and collaboration within your team and ecosystem.

3 Modern graphical UI and visual tools, providing exceptional ease of use.

Highly integrated WMS and MES that enhances your company's agility

Warehouse automation that integrates complex processes easily

Interactive dashboards and intuitive interfaces to increase your team's performance

Gamification tools that quicken end-user training and multi-site rollouts

2D mapper and heatmap for increased productivity

A highly-engaged user community continuously shaping our solutions

Over 150 proven standard business processes to get a headstart

Over 500 KPI report variations for ultimate accuracy

WE TURN YOUR BUSINESS PAIN POINTS INTO BENEFITS

Changes in purchasing habits	»»	Manage eCommerce, omni-channel, retail, wholesale order types efficiently
Changes in lifestyle	»»	Manage food restrictions (vegan, gluten free, kosher, allergens)
Evolving food safety regulations	»»	Robust item traceability and recall reporting capabilities
Changing environmental pressure	»»	Efficiently manage different types of packaging materials (recyclable, biodegradable)
Supply chain issues	»»	Track inventory in real-time throughout the supply chain, by FIFO/FEFO, improving inventory accuracy, forecasting and reduce safety stock
