

E-invoicing: Generix Group supports Europcar as it adopts SaaS in nine countries

Paris, 30 January 2014 – Generix Group, the publisher of collaborative B2B software and on-demand services, has announced that it will be supporting Europcar in its deployment of e-invoicing based on its Invoice Manager On Demand platform. The new e-invoicing system will be deployed at nine subsidiaries of the Europcar group, Europe's leading car hire company.

Always focused on customer satisfaction, Europcar has been offering electronic invoicing services for about the last ten years. To optimise its e-invoicing service and accelerate the deployment of paperless invoicing, Europcar International launched a European consultation at the end of March 2013 on a single point of contact for e-invoicing to be used by all its subsidiaries.

"Europcar is one of the first companies with a high invoicing volume to choose the new unlimited, no-commitment tax-compliant e-invoicing solution from Generix Group*," explains Christophe Viry, Product Director of the Generix Collaborative Integration range. ***"This unlimited invoicing model will allow it to deploy its B2B flows more quickly while reducing the cost of its paperless invoicing services."***

About Generix Group

A publisher of collaborative software and On Demand services, Generix Group supports customers in managing, computerising, pooling and optimising their information. The Generix Collaborative Business service bundle is based on business expertise in the fields of ERP, supply chain and managing cross-channel sales, as well as the Generix Collaborative Integration range: EDI, B2B, EAI, Portal, e-invoicing and B2B roll-out.

The GCI integration and collaboration solutions are used in over 20 countries by 5,000 companies, including Banque de France, Carrefour, Casino, DHL, Ferrero, Fnac, Fromageries Bel, Galeries Lafayette, Gefco, Kuehne + Nagel, L'Oréal, La Redoute, Labinal, Lactalis, LDC, Minefi, PSA, Rexel, Safran, Schneider, Société Générale, Tereos, TF1, Unilever, Zodiac etc. www.generixgroup.com

About the Invoice Manager On Demand service

Already used by over 1,200 companies, the GCI Invoice Manager On Demand service provides full e-invoicing functionality: processing all forms of invoices, creating originals for tax purposes, legal archiving, data conversion and transport, traceability and reporting console, free interoperability with other B2B operators, etc. The service also provides a multi-service portal for users, allowing them to speed up roll-out and to collaborate with partners on matters related to invoice processes.
