STIME extends the use of the Generix WMS solution in its warehouses in France and Europe for another 6 years

Generix Group a global provider of collaborative SaaS Software solutions for the Supply Chain, industrial, and retail ecosystems, has announced the extension of its partnership with STIME for a period of six years, for the maintenance of the Generix WMS solution on current and future warehouses in France, Poland, Belgium and Portugal.

STIME, the Information System Department of Les Mousquetaires group and historical partner of Generix Group for more than 30 years, has recently confirmed the extension of the Generix WMS Solution for its warehouse management operations in France and in Europe.

The group Les Mousquetaires represents a portfolio of 7 food and non-food supermarket chains, including Intermarché, Netto, Bricomarché and Bricorama, which represent nearly 4,000 points of sale in Europe. The Group is one of the few players in the mass retail sector to operate its logistics activities in an integrated manner.

STIME will continue to capitalize on Generix's WMS solution performances, which today represents a secure and robust option that has been used to operate the Group's various warehouses since the early 1990s.

This new step in the relationship of trust that links the two companies for 6 new years will involve, so far, 59 warehouses.

"We are very pleased to extend our partnership with Generix Group for the next few years. We have full confidence in the robustness of Generix's WMS solution, which has enabled us to operate our centers for over 30 years. The solution currently in place enables us to secure the continuity of our logistics operations and therefore the supply of all our stores", says **Alain Perrochais, Intermarché Director in Cholet, administrator** for STIME.

"We are very pleased to renew our partnership with STIME for our WMS warehouse management solution and to contribute to the achievement of its development and growth objectives. Our solution allows us to support STIME in its Industrialization strategy via the Automation and Mechanization processes of the Les Mousquetaires Group warehouses. The long-standing relationship of trust that has bound our two companies now enables us to meet STIME's business challenges, both in terms of managing its physical flows, with our WMS solution, and its logical flows, thanks to our EDI solution, now deployed as a SaaS solution for STIME," emphasizes **Philippe Seguin, Managing Director France** at Generix Group

About Generix Group

Generix Group is an expert in the Collaborative Supply Chain with presence in 60 countries thanks to its subsidiaries and network of partners. More than 6,000 companies around the world use its SaaS solutions. The group's 800 employees provide daily assistance to clients such as Carrefour, Danone, FM Logistic, Fnac-Darty, Essilor, and Ferrero in the digital transformation of their Supply Chains. Its collaborative platform, Generix Supply Chain Hub, helps companies keep their promises to their customers. It connects companies to all their partners so together they can operate physical flows, digitize information flows, and collaboratively manage processes in real time. Generix Supply Chain Hub is intended for all actors in the supply chain: manufacturers, logistic service providers (3PL/4PL), and distributors.

Founded in 1990 in France, the company is listed on the Euronext Paris Stock Exchange, compartment C (ISIN: FR0004032795).
