Press release

September 15th, 2021

GENERIX Group selected by CINEA (European Climate, Infrastructure and Environment Executive Agency), an agency of the European Commission, as part of the EUROLogin2020 digital innovation call project

Generix Group, a global provider of collaborative SaaS Software solutions for the Supply Chain, industrial, and retail ecosystems, announces the signature of the "EUROLogin2020 Action: Cloud platforms using the cross-border identification of European citizens through eIDAS node" innovation contract. As part of this program, Generix Group will be in charge of implementing interoperability standards for the digital identification of individuals and legal entities at European level.

EUROLogin2020 is a European consortium coordinated by the University of Valencia in Spain (via IRTIC, Institute on Robotics and Information and Communication Technologies) and composed of EDI/B2B services operators: Nubilaria in Italy, headON in the Netherlands and Generix Group in France. Generix Group's application to join the EUROLogin2020 consortium has also received the support of the "Direction Interministérielle du Numérique", one of the Prime Minister's departments in France.

The project is part of the European Commission's "Connecting Europe Facility" program to support the digital single market and cross-border mobility. The approach is based on European interoperability standards, including those imposed on member states by the eIDAS (electronic IDentification Authentication and trust Services) regulation. Its principle is based on the mutual recognition of digital identifiers between the eIDAS nodes that must be deployed within the 27 Member States.

Thanks to this program, Generix Group will offer its customers national digital identifiers (eID) that can be used on its services as well as on a cross-border scale. Generix Group's SaaS services will integrate the technologies of the European Digital Services Infrastructure (eID DSI) and will be connected to the French eIDAS node.

"Thanks to these innovations, Generix Group will enable its customers to use the new digital identification and authentication standards ahead of time. Users of our services will benefit from facilitated interoperability while increasing their digital security and complying with regulatory constraints," says Christophe Viry, Generix Group Product Marketing Manager.

Note: For more information on the CEF and INEA programs, visit www.ec.europa.eu/inea/en.

INEA ceased its activities on March 31, 2021. The European Climate, Infrastructure and Environment Executive Agency (CINEA) was created on April 1, 2021 to take over its inherited portfolio and other EU funding programs.

About Generix Group

Generix Group is an expert in the Collaborative Supply Chain with presence in 60 countries thanks to its subsidiaries and network of partners. More than 6,000 companies around the world use its SaaS solutions. The group's 770 employees provide daily assistance to clients such as Carrefour, Danone, FM Logistic, Fnac-Darty, Essilor, Ferrero and Geodis in the digital transformation of their Supply Chains.

Its collaborative platform, Generix Supply Chain Hub, helps companies keep their promises to their customers. It connects companies to all their partners so together they can operate physical flows, digitize information flows, and collaboratively manage processes in real time. Generix Supply Chain Hub is intended for all actors in the supply chain: manufacturers, logistic service providers (3PL/4PL), and distributors.

Founded in 1990 in France, the company is listed on the Euronext Paris Stock Exchange, compartment C (ISIN: FR0004032795). To find out more www.generixgroup.com
