## **U IRIS chooses Generix Group as its Dematerialization Platform Partner of Tax Authority to support the implementation of an invoice dematerialization process**

**Generix Group, a global provider of collaborative SaaS Software solutions for the Supply Chain and Commerce ecosystem and operator on the electronic invoice market for 20 years, announces its selection as a Dematerialization Platform Partner of Tax Authority to support U IRIS, the U group's Information Systems Department, with its Generix Invoice Services solution. This new process will involve all incoming and outgoing invoices processed by the group by July 2024.**

Système U is the 4th largest food distribution group in France. It includes the Hyper U, Super U, Marché U, U Express and Utile brands. The U Group is a network of independent retailers who sell national and private label consumer products in outlets operated under the U brand. The U group is present in France, represented by 73,000 employees and 1,700 sales outlets, managed by associates and spread throughout the country.

As part of the upcoming implementation of the 2024-2026 tax reform, which requires French companies to receive and issue invoices in electronic format, U IRIS has appointed Generix Group to handle its invoice dematerialization project. The ambition of this project for the U group is to be able to process all the company's invoices, i.e around 12 million invoices per year from 2024 and up to 15 million thereafter.

The project will be deployed in two stages, the first for transactions involving central purchasing units and the second for processing the incoming and outgoing invoice flows of the 1,700 sales outlets.

U IRIS was looking for a consulting partner with a highly adaptable solution that would perfectly meet all its business needs. The understanding of the stakes and the contextualization of the solution by Generix Group's teams convinced the company's project teams to start this collaboration together.

*« The implementation of the 2024-2026 tax reform represents a real challenge for us, due to the volume of invoices processed and the structure of our organization. That's why we were looking for a partner with strong expertise in dematerialization, able to integrate our business challenges and offer us a high-performance solution that can be easily deployed on a large scale. This is what the Generix Group teams were able to demonstrate to us throughout the tender process we carried out. We are convinced of Generix Group's strong expertise to carry out this structuring project and meet the requirements of the new reform, while facilitating the change of invoicing process for all our stakeholders. », comments **Benoît Mousset, Project Director** for U IRIS.*

*« I am very happy to see Generix Group position itself as a trusted partner for the dematerialization of Système U's invoicing process. The company is indeed exposed to strong stakes in the context of the arrival of the 2024-2026 tax reform. We have worked closely with the teams of U IRIS to offer the response and advice best suited to their needs and their business context. »*, adds **Philippe Seguin, General Manager of Generix Group in France.**

#### About Generix Group

Generix Group is an expert in the Collaborative Supply Chain with a presence in 60 countries thanks to its subsidiaries and network of partners. More than 6,000 companies around the world use its SaaS solutions. The group's 800 employees provide daily assistance to clients such as Carrefour, Danone, FM Logistic, Fnac-Darty, Essilor, Ferrero and Geodis in the digital transformation of their Supply Chains. Its collaborative platform, Generix Supply Chain Hub, helps companies keep their promises to their customers. It connects companies to all their partners so together they can operate physical flows, digitize information flows, and collaboratively manage processes in real time. Generix Supply Chain Hub is intended for all actors in the supply chain: manufacturers, logistic service providers (3PL/4PL), and distributors.
