Generix Group certified ISO 27001

Generix Group, a global provider of collaborative SaaS Software solutions for the Supply Chain, industrial, and retail ecosystems, obtains the ISO/CEI 27001 certification delivered by Certi-Trust.

By obtaining ISO 27001 certification, an international standard, Generix Group confirms its commitment to guaranteeing its customers very high security standards in the services provided, as well as the highest levels of confidentiality in the processing of their data.

This standard is the international reference for the implementation of an Information Security Management System (ISMS) and allows to certify the existence of processes, procedures and management systems to identify cyber threats, control the associated risks, and implement the appropriate protection measures. This is to ensure the confidentiality, availability and integrity of information.

The Information Security Management System (ISMS) thus set up meets the following strategic imperatives that are essential for Generix Group's customers:

- Ensure the confidentialitý of the hosted data
- Guarantee the integrity of the data
- Provide availability of SaaS services to ensure the continuity of contracted services
- Enable the tracking of activities within the SaaS platforms
- Comply with legal and regulatory requirements applicable to the scope of the ISMS

"*We are very pleased to have been contributing, through our activities, to improving the confidence - particularly in the digital field - that Generix Group can continue to provide to its customers and partners thanks to the ISO 27001 certification. The active collaboration of all the teams during the certification audit has clearly indicated the high investment at all levels of the company in obtaining this certificate*", says **Pierre Dewez, Chief Executive Officer** of Certi-Trust.

Obtaining this certification is a new structuring step in Generix Group's information security governance strategy and constitutes its keystone.

"*Obtaining ISO 27001 certification is the result of a collective effort within the Group to always offer our customers the highest quality services while guaranteeing the confidentiality and security of their data. This is a logical step in our overall strategic plan, Boost Together 2025, of which operational excellence is one of the main pillars,*" says **Jean-Charles Deconninck, President** of Generix Group.

The ISO 27001 certification issued by Certi-Trust covers the European scope of Generix Group's Information Security Management System (ISMS), which includes the operational activities of SaaS, operating, supervising and supporting the company's Supply Chain Hub services.

About Generix Group

Generix Group is an expert in the Collaborative Supply Chain with presence in 60 countries thanks to its subsidiaries and network of partners. More than 6,000 companies around the world use its SaaS solutions. The group's 800 employees provide daily assistance to clients such as Carrefour, Danone, FM Logistic, Fnac-Darty, Essilor and Ferrero in the digital transformation of their Supply Chains. Its collaborative platform, Generix Supply Chain Hub, helps companies keep their promises to their customers. It connects companies to all their partners so together they can operate physical flows, digitize information flows, and collaboratively manage processes in real time. Generix Supply Chain Hub is intended for all actors in the supply chain: manufacturers, logistic service providers (3PL/4PL), and distributors.

Founded in 1990 in France, the company is listed on the Euronext Paris Stock Exchange, compartment B (ISIN: FR0004032795). To find out more www.generixgroup.com
