

**Generix Group supports Carrefour France on the interoperability of electronic invoicing as part of the European Commission program EURINV19**

**Paris, October 20, 2020 - Generix Group, for its participation in EURINV 19\* project, of the European Commission's Connecting Europe Facility\*\* program, announces the adaptation of its eInvoicing solution to the new European standards with Carrefour France.**

The EURINV19 program is a consortium of 14 participants from 8 member states (Sweden, Slovakia, Ireland, Spain, United Kingdom, Italy, France and the Netherlands) collaborating on the "Implementation of the European standard for cloud-based e-invoicing platforms". The project is coordinated by IRTIC (Institute of Robotics, Technology, Information and Communication) of the University of Valencia in Spain. Six European eInvoicing cloud platforms providers are participating, as well as 8 user companies and local communities.

Endorsed in this initiative by the DINUM (Interministerial Department of Digital Technology), Generix Group is assisting Carrefour France as a user of its eInvoicing solution, to comply with European electronic invoicing standards. Both companies representing France in the program.

The goal of EURINV19' project is:

- to implement with eInvoicing providers and selected users, the European standards for electronic invoicing in accordance with the 2014/55/EU directive, the eIDAS regulation and national regulations. Each beneficiary will upgrade its eInvoicing solution to support EN 16931 standard (UBL 2.1 and UN CEFAC TII) electronic invoice syntax and interoperability through the PEPPOL network, of which Generix Group is one of the certified access points in France and Benelux.
- to promote the European standards necessary for European digital interoperability among businesses and local communities.

## **Generix Group helps Carrefour in adopting European standards for electronic invoicing.**

Carrefour France and Generix Group are participating in the project to integrate European standards into the eInvoicing solution used by Carrefour France and deployed with thousands of its suppliers.

Thanks to this project, Carrefour France will offer new e-invoicing facilities to its trading partners and help medium-sized companies to deploy e-invoicing by promoting digital interoperability standards.

This initiative will thus enable Carrefour France to support UBL 2.1 and UN-CEFACT syntaxes in its invoice exchanges with its suppliers, to receive invoices from suppliers belonging to a member state via the PEPPOL e-delivery Network and the European AS4 eSENS profile protocol.

The evolution of the solution developed by Generix Group will finally enable Carrefour France to issue invoices supporting European standards to its private and public customers via national platforms such as Chorus Pro.

"Generix Group is very proud to support Carrefour France in this project to promote interoperability standards for eInvoicing. This initiative, supported by the European Commission, will simplify the development of eInvoicing, especially for small and medium-sized companies, which is essential in the present health crisis," says **Christophe Viry, Product Marketing Manager at Generix Group**.

### **About Generix Group**

Generix Group is an expert in the Collaborative Supply Chain with presence in 60 countries thanks to its subsidiaries and network of partners. More than 6,000 companies around the world use its SaaS solutions. The group's 650 employees provide daily assistance to clients such as Carrefour, Danone, FM Logistic, Fnac-Darty, Essilor, Ferrero and Geodis in the digital transformation of their Supply Chains. Its collaborative platform, Generix Supply Chain Hub, helps companies keep their promises to their customers. It connects companies to all their partners so together they can operate physical flows, digitize information flows, and collaboratively manage processes in real time. Generix Supply Chain Hub is intended for all actors in the supply chain: manufacturers, logistic service providers (3PL/4PL), and distributors.

Founded in 1990 in France, the company is listed on the Eurolist market of the Euronext Paris Stock Exchange, compartment C (ISIN: FR0004032795). To find out more: [www.generixgroup.com](http://www.generixgroup.com)
