

Generix WMS

is a global, customizable Warehouse Management System with in-depth functionality and unlimited scale.

Gartner

2025 Magic Quadrant
for WMS

How does your logistics support your business?

As international global trade challenges are increasing, companies aim to shift from global to globally-connected, multi-local value chains.

New industry requirements acceleration are increasing the daily customer promise delivery challenge and operational costs.

New business models like circular economy are leading companies to redesign their Supply Chain, unlocking economic value.

Successful logistics adapts to business challenges

Expand local efficient logistics facilities anywhere in the world.

Adapt logistics to your target industries and raise the stage of excellence with lower costs.

Support company turning to new economy models by deploying circular loops as much efficient as linear supply chain's.

Generix WMS helps your ever-changing business.

What is Generix WMS?

World class functionality and unrivaled scale WMS to support your sophisticated operations that need advanced tech to tackle new business models.

CORE features
